SAI CHOLIK VEMPATI

DATA ANALYTICS | BUSINESS INTELLIGENCE

Florence, Kentucky | saicholikvempati@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Data analytics and business intelligence professional with an M.S. in Information Systems (Data Analytics) and hands-on experience turning operational, customer, and performance data into dashboards and decision-ready insights. Skilled in Power BI, Tableau, SQL, Python, R, Excel, ETL, REST APIs, data modeling, validation, and documentation. Experienced in stakeholder reporting, KPI development, anomaly analysis, requirements translation, and communicating technical findings to non-technical audiences.

SKILLS

Business Intelligence: Power BI (DAX, Power Query, semantic models, drill-downs), Tableau (parameters, maps, Top-N filters), Looker Studio, Cognos Analytics, KPI design, dashboard development, data storytelling
Data Analysis: SQL, Python (Pandas, NumPy, scikit-learn), R (tidyverse, dplyr, ggplot2), Excel (PivotTables, XLOOKUP, VLOOKUP, SUMIFS, Power Query), statistical modeling, regression, forecasting, segmentation
Data Engineering & Databases: ETL pipelines, REST APIs, MySQL, PostgreSQL, BigQuery, data modeling, joins, reconciliation, validation rules, missing-value treatment, duplicate detection, Git/GitHub
Cloud & Enterprise Systems: Google Cloud, AWS (S3, Glue, Lambda, Step Functions, Athena), Azure Databricks, SAP S/4HANA (MM, PP, FI, CO, SD), Jira
Business & Governance: Requirements gathering, SOPs, data dictionaries, metric definitions, process documentation, audit-ready reporting, root-cause analysis, stakeholder presentations, cross-functional collaboration

EXPERIENCE

Server Tester | Jabil, Florence, KY – Contract via Lorien/CER **Oct 2026 – Present**

- Execute server testing in a high-volume manufacturing environment, verifying hardware and system results against established work instructions and quality requirements.
- Record completed server-testing data in Excel, including test outcomes and observed issues, to maintain accurate, traceable production records for review and reporting.
- Review recorded results for recurring failures and anomalies, document troubleshooting details, and communicate findings to technical leads for escalation, resolution, and process improvement.

Student Assistant | Central Michigan University Library, Mount Pleasant, MI **Aug 2024 – May 2026**

- Consolidated operational and spending records using Excel and Tableau, producing monthly summaries of activity volumes, repairs, restocking, additions, and cost patterns for supervisor decision-making.
- Validated internal-system records for completeness and consistency; investigated missing, duplicate, and conflicting entries and standardized recurring reporting procedures to strengthen data reliability.
- Gathered reporting needs from supervisors, translated operational questions into tables and visualizations, and presented trends, exceptions, and recommended follow-up actions to non-technical stakeholders.
- Balanced reporting deadlines with daily service responsibilities while maintaining accurate documentation and supporting staff, students, and library operations.

Data Analyst | Rjay Technology, Hyderabad, India **Apr 2023 – Mar 2024**

- Extracted, cleaned, joined, and validated business datasets using SQL, MySQL, Excel, and Python; resolved duplicate records, missing values, inconsistent formats, and conflicting source data before reporting.
- Built recurring Power BI and Tableau dashboards that communicated KPIs, operational trends, and unusual results, translating stakeholder questions into clear analytical outputs and recommendations.
- Wrote and optimized SQL queries for data extraction and reporting; maintained structured relational data and performed reconciliation checks to improve consistency across recurring reports.
- Authored SOPs, data dictionaries, calculation logic, validation rules, and metric definitions to support reusable analysis, knowledge transfer, and standardized reporting.

Python Full Stack Developer Intern | RedCarpet Animation VisualFX, India **Dec 2022 – Mar 2023**

- Developed Python and MySQL application components during a structured internship, connecting user-facing workflows with database operations and practicing reusable object-oriented code organization.
- Tested and debugged application functions, validated inputs and database results, tracked issues using Jira, and worked in a Linux-based development environment to resolve defects.
- Prepared technical documentation covering application logic, database structure, testing outcomes, and troubleshooting steps to support review and knowledge transfer.

PROJECTS

NBA Player KPI Dashboard | *Power BI, DAX, Power Query, REST API*

- Integrated live API data for 500+ NBA players, transformed nested records in Power Query, established model relationships, and created 20+ measures covering scoring, efficiency, usage, and player comparisons.
- Designed interactive dashboards with team, player, season, and position filters, drill-down navigation, conditional formatting, and KPI cards for rapid performance exploration.
- Reconciled source totals, tested DAX calculations, addressed null and inconsistent values, and documented transformations, metric definitions, and refresh procedures.

Airbnb Market Analysis | *Tableau, SQL, Excel*

- Prepared and analyzed 200,000+ listing records across 200+ regions, standardizing location, pricing, availability, and review variables for consistent market comparisons.
- Built Tableau dashboards with geographic maps, parameter controls, Top-N filters, trend views, and market segmentation to identify pricing differences and high-performing regions.
- Delivered a reusable self-service reporting view that reduced manual analysis effort by 30% and supported clear market and investment recommendations.

VDI System Usage and Compliance Analysis | *R, SQL, dplyr, ggplot2*

- Joined and cleaned 227,386 infrastructure and application log records, standardized timestamps, removed invalid sessions, and analyzed activity across 3,013 unique accounts.
- Identified peak usage, operating-system distribution, power-user behavior, and potential compliance exceptions; produced documented visual reports that improved reporting accuracy by 22%.

AWS YouTube Trending Data Pipeline | *AWS S3, Glue, Lambda, Step Functions, Athena, Python*

- Designed a cloud ETL workflow to ingest and standardize trending-video data across 10 regions, applying five automated data-quality checks for completeness, schema consistency, and valid values.
- Organized curated data for serverless SQL analysis in Athena and documented pipeline components, validation logic, and operational flow for reproducibility.

US Retail Sales and Shipping Analysis | *R, dplyr, ggplot2, Excel*

- Unified 13,000+ records from three regional datasets, standardized dates and columns, handled missing discounts, and established consistent sales, shipping, and profitability comparisons.
- Analyzed regional delivery times, category profits, customer segments, and yearly sales trends; created visuals and recommendations highlighting performance gaps and growth opportunities.

2-Degree Climate Strategy Blueprint | *R, MATLAB, EN-ROADS*

- Evaluated 34 climate-policy scenarios and modeled relationships among energy, emissions, temperature, and economic assumptions using regression and scenario analysis.
- Built an explanatory model with $R^2 = 0.82$, compared intervention combinations, and translated quantitative findings into a practical strategy for progress toward a 2-degree pathway.

CERTIFICATIONS

Google Data Analytics Professional Certificate (2026) • Google Cloud Data Analytics Certificate (2026) • Deloitte Australia Data Analytics Job Simulation (2026) • Tata GenAI-Powered Data Analytics Job Simulation (2026)

EDUCATION

M.S. Information Systems (Data Analytics), Central Michigan University, Mount Pleasant, MI May 2026
GPA: 3.8/4.0 • Coursework: Business Data Analytics, Database Systems, Statistical Modeling, Data Mining, Data-Driven Quality Management, Enterprise Systems, Project Management

B.Sc. Mathematics, Statistics and Computer Science, J.K.C. College, India May 2023
Focus: Statistical inference, probability, regression analysis, computational statistics, data structures, programming, relational database management, linear algebra, and numerical methods
